

## QUEEN, KING, ACE MULTIPLIER

### *Format, Scoring, Handicap Allowance*

An individual competition played under strokeplay rules, scored as in stableford with full handicap allowance.

### *Course Adjustment*

Players play off their own tee's stroke indexes and PARs consequently there is no course adjustment

### *Description*

This is almost the same as a Jack, Queen, King, Ace competition, except that the value of the wildcard is used to multiply the stableford score on the respective hole, rather than being added to it.

This is a normal stableford competition, but with a twist, the twist being that you have four "wildcards" that you may play on any hole on the course. **You may play only one wildcard on a hole.** e.g. You cannot play both the Queen and the King on the same hole. **Once a wildcard has been played it cannot be played again.**

The points value of the wildcards are:

WILDCARD	Queen	King	Ace
VALUE	2	3	4

Before teeing off on a hole you may declare that you are playing a specific wildcard on that hole. Provided that you score at least one stableford point on that hole, you add the value of the wildcard you nominated. If you do not score any stableford points on that hole then you score zero and the wildcard is wasted.

Pick up if unable to score any stableford points on a hole.

Wildcards should be indicated on the scorecard for the holes on which they were played.

**You must record the gross score** on each hole in "Score" column A and record the stableford score (including any wildcard points) in the "Points" column.

**Both the marker and the player must sign the card.**

### *Example*

Jake Nicklaus plays his wildcards as follows:

HOLE	WILDCARD
6	King
13	Queen
15	Ace

Unfortunately he puts the ball in the water on the 13<sup>th</sup> and fails to score any stableford points on that hole, so he has wasted the 2 points that the Queen would have given him.

The scorecard for such a scenario follows.
